Amendments to the Specification:

Please replace paragraph [0065] with the following rewritten paragraph:

[0065] In the pattern 43 as shown in Fig. 6, the sub pixels R and B of a pixel 43a at an upper left side have low grayscale values and the sub ~~pixels~~ pixel of G thereof ~~have~~ has a high grayscale ~~values.~~ value. Meanwhile, the sub pixels of R and B of a pixel 43b at a lower left side have high grayscale values and the sub ~~pixels~~ pixel of G thereof ~~have~~ has a low grayscale ~~values.~~ value. In this way, a vertical viewing angle range is improved also by giving a grayscale value difference in the vertical direction ~~in~~ of the sub pixel ~~unit~~ units. In the pattern 44, ~~all of~~ the sub pixels R and B of the ~~constituting~~ two pixels 44a and 44c at an upper side have low grayscale values and ~~all of~~ the sub pixels of G thereof ~~constituting two pixels 44b and 44d at a lower side~~ have high grayscale values. ~~This pattern also may be a pattern whose vertical direction is reversed.~~ Meanwhile, the sub pixels of R and B of the two sub pixels 44b and 44d at a lower side have high grayscale values and the sub pixels of G thereof have low grayscale values.
